

Gut Gremmelin 10 & 11 September 2026 (Am Hofsee 33, 18279 Lalendorf-Gremmelin)

Thursday 10 September 2026

09:00		Arrival	
09:30	09:45	Welcome	
09:45	10:45	Introduction Participants	
10:45	11:00	Coffee Break	
11:00	11:15	CTNR & Funding opportunities	
		Neurological Disorders I: Parkinson's Disease	
11:15	11:35	Talk	Effects of subthalamic nucleus deep brain stimulation on gait in two mechanistically different rat models of Parkinson's disease (Meike Statz)
11:35	11:55	Talk	Basal Forebrain Atrophy and Cholinergic Pathway Degeneration Identify Cognitive Impairment in Parkinson's Disease (Adrija Mahapatra)
12:00	13:00	Lunch	
		Neurocognitive Development	
13:00	13:20	Talk	Strengthening the Evidence for Neonatal Hypothermia: Trial Integrity and Global Equity (Rodrigue Ndabashinze, Anne Fink)
13:30	14:30	Keynote Lecture	Long-term developmental consequences of being born at neonatal risk (Robert John Eves)
14:30	15:00	Coffee Break	
		Neurological Disorders II: Alzheimer's Disease	
15:00	15:20	Talk	Subcortical vulnerability in autosomal dominant Alzheimer's disease: from Columbian PSEN1 E280A to DIAN cohorts (Alice Garzia)
15:30	16:30	Keynote Lecture	Targeting pGlu-Abeta in Alzheimer's disease (Steffen Roßner)
16:30	18:00	Posterpresentation and Networking	
18:00	19:00	Dinner	

Friday 11 September 2026

07:30	08:30	Breakfast	
		Neurological Disorders III: Amyotrophic Lateral Sclerosis	
08:30	08:50	Talk	Retrotransposable elements are activated in FUS-ALS (Anže Karlek)
08:50	09:10	Talk	Convergent toxic gain- and loss-of-function mechanisms of VAPB disrupt ER–autophagy homeostasis and RNA-binding protein proteostasis in ALS-8 (Priyanka Tripathi)
09:10	09:30	Coffee Break	
09:30	12:30	Workshop	Project Management for Scientists (Virginia Bolowski)
12:30	13:30	Lunch	
		Neurogenesis and Neurodegeneration: Cellular and Molecular Mechanisms	
13:30	13:50	Talk	S1PR5 Regulates Oligodendrocyte Maturation and Myelin Integrity in Development and Demyelination (Newshan Behrangi)
13:50	14:10	Talk	Quantitative Assessment of GFAP-Based Astrocyte Morphology in the Cuprizone Model (Lukas Wenzel)
14:10	14:30	Talk	Microglia regulate layer V neuron numbers immediately after birth (Franz Markert)
14:30	14:50	Talk	Impact of norepinephrine on adult neurogenesis (Svenja Koch)
15:00	15:30	Coffee Break	
15:30	16:30	CTNR Idea Lab	
16:30	17:00	Closing remarks
